**mastodont
baits**

We do it differently !

Our vision is to provide an exceptional and different offer of fish baits, which guarantee successful fishing trip to each carp angler, without any environmental damage. Mastodont Baits boilies are produced at Czech Republic by Czech carp anglers. Products are produced from high quality raw materials and before release to market, tested by Mastodont Baits testing team and friendly anglers.

Each series is based on unique base mixture, which is made by our own. Our boilies are full of proteins, amino acids, saccharides, enzymes and other important ingredients, what is visible already for a first sight. Another feature, visible immediately, is „hairy“ structure of our main boilie series, which makes rapid diffusion of attractive components into water environment and attracts fish. Shape of our boilies is not perfectly round with purpose – which natural fish food is perfectly round ? Our boilies are mainly man-made, it is not possible to produce it on standard industrial lines, so you can be sure, that each bait meets our hands and is original.

Mastodont Baits boilies do not contain non-thermally processed bulk raw materials, food rubber or other non-standard binders. Reason for this is fact, that such materials can influence efficiency and can be indigestible what can be dangerous for fish.

Our portfolio consists of standard solid boilies, pop up boilies, balanced boilies, dips, boosters, boilie paste, essences – everything what you need for trophy carp fishing.

6x WHY Mastodont Baits

1. We are a small family company focused on premium HNV (high nutritive value) boilies and HEV (high energy value) boilies. Each boilie is in touch with our hands during production, starts from rolling, later vaporizing and drying, which takes 3-4 days at room temperature at correct humidity, and ends with packaging.
 2. All series of our products are based on best quality raw materials and contain easily digestible proteins and sugars such as fructose and maltodextrine. If you bait with our HNV products, fish get energy and everything it needs very rapidly. This leads to situation, that fish is not searching for natural food, but feeds itself by our baits and thanks to digestive enzymes, fish is coming back to our baiting spot frequently.
 3. Carp fishing with our products is based on low amount of feeding – it is OK to bait just few boilies around rig and few pieces to area, so at the end of the day, you are saving your costs. Key is to bait less and more often, it is necessary, that fish can still find something. Effectivity is hidden in regularity and quality. We recommend to bait about 0.5 kg – 2 kg per rod per day – depends on activity. All these aspects leads to fact, that small fish are normally not interested and bait is waiting for trophy one !
 4. Each boilie series is based on its own basic mixture with different raw materials and different structure. If fish is aware of danger in case of one type, it has no problem to feed with other types. If basic mixtures would be similar, normally fish would not take different series, however smell is different.
 5. All our products have own, unique aroma made of mixture of essences and essential oils with different base, so spread of aroma is different. This makes our products suitable for fishing in cold water and warm water during whole year. Our aroma end essences are unique in world market of baits. For example dill and elderberry will never be found at different producers.
 6. We are only producer in Europe, who has no fear to produce boilies for extreme conditions. We are offering unique Hard and Light boilies at 36mm diameter ! Hard big boilies are optically selecting small fish, but due to cork, weight is similar to 24mm standard boilies. During strike, your adrenaline is at 100%, because you can expect, that fish is usually over 15kg.
- + We have no problem to share our best practices, recommendations, rigs and technique, which dramatically reduce your time to be successful. Check our web site, blog or youtube channel and we believe, it will move you further. We really recognize, that first step is to fish at right spot, then technique comes and third thing is high quality bait, but right bait is winner, especially at places with enormous angling pressure. Buying our products means also purchasing our know-how and customer service.

BOILIES

**BLACK
MAMBA**

Boilies, which was fine tuned to perfection for years, is absolutely unique in the world market of carp baits due to it's flavour of Elderberry.

This specially developed and unknow flavour for fish, complemented by additional citrus esters and animal amino acids, makes Black Mamba a very natural as well as attractive bait which works for all water temperatures. Boilies has sweet and hot taste with a slight drop of elderberry flavour. The basic mixture is built mainly of premium enzymatic treated fish powder, animal extracts, but also contains a high proportion of milk proteins, which makes the bait attractive even if there is plenty of natural food in the water. It also contains a high proportion of monosaccharides and different sugars, which is particularly important for fishing on rivers and large waters.

Best practice : Well matured Black Mamba works best when milk protein is released !

Boilies Black Mamba is available in 20, 24 and 36mm diameters in solid version as well as in „balanced“ version. Delivered in following packaging : 1kg – bucket, 3kg – bucket and 5kg – bag. Series Black Mamba consists of Paste, Booster, Dip, Pop-up 16mm and mixture of 20mm / 24mm balanced boilies in dip.

BOILIES

BERRY BOOM

Berry Boom is very attractive fruity HNV boilies. This boilies is incredibly fast on all types of water and during whole year. It is unbelievable, how many fish is convinced to feed, even in unfavorable conditions. This boilies is so catchy, that we had a moral dilemma whether to even offer it to market. Berry Boom is one of our bestseller and most popular boilies.

Basic mixture is built on birdseed and milk proteins, what means it doesn't take odors from area. It has a high content of milk proteins, amino acids and quickly digestible sugars. This combination, topped off with usage of the finest flavours and a few secret ingredients, makes this product an exceptional „killer“ among trophy carp baits. Now you have a unique opportunity to try this secret weapon too.

Recommendation: Beware of highly attractive boilies and we recommend to bait with smaller volume at wider area, or just a few baits around the rig or using PVA materials. Magic of success is regular baiting, with increase of strikes over the time, until potential of spot for that flavour is exhausted.

Best practice : Best boilies to muddy or cold water !

Boilies Berry Boom is available in 20, 24 and 36mm diameters in solid version as well as in „balanced“ version. Delivered in following packaging : 1kg – bucket, 3kg – bucket and 5kg – bag. Series Berry Boom consists of Paste, Booster, Dip, Pop-up 16mm and mixture of 20mm / 24mm balanced boilies in dip.

BOILIES

KOSA

Boilies KOSA is absolutely natural meat boilies, where in addition to animal extracts and fish powder, mixture of spices and essential oils of Dill - Asafoetida - Black Pepper is used. There is just enough bulk part to keep the bait solid. Kosa worked well during whole year – most versatile boilies at our portfolio. It had great results also at big rivers and large areas of water.

Best practice : TOP boilies for quick fishing and cold water fishing with exceptional flavour, which you will never find somewhere else !

Boilies Kosa is available in 20, 24 and 36mm diameters in solid version as well as in „balanced“ version. Delivered in following packaging : 1kg – bucket, 3kg – bucket and 5kg – bag. Series Kosa consists of Paste, Booster, Dip, Pop-up 16mm and mixture of 20mm / 24mm balanced boilies in dip.

BOILIES

CHILL BANANA

Chill Banana is the new product for 2020. This bait contains all experience of a proper carp angler. Boilies is built especially for large water, reservoirs, dams and large rivers. Chill Banana Boilies is more tight with slower disintegration and has a very fine texture so that will keep it waiting longer time for the "right" trophy carp. But this bait can be also attractive enough to work quickly, effectively, all year round.

It contains mainly easily digestible chilli, fish powder and carbohydrates. This combination ensures a perfectly balanced protein and energy content and excellent digestibility. These qualities are complemented by extracts, amino acids and a mix of essences and essential oils, where banana and sea food flavours are dominating. This boilies is salty and have a exceptionally spicy taste, what carp loves.

Best practice : Boilies dedicated for longer baiting campaigns at large water !

Boilies Chill Banana is available in 20, 24 and 36mm diameters in solid version as well as in „balanced“ version. Delivered in following packaging : 1kg – bucket, 3kg – bucket and 5kg – bag. Series Chill Banana consists of Paste, Booster, Dip, Pop-up 16mm and mixture of 20mm / 24mm balanced boilies in dip.

BOILIES

AK-CKO

AK-cko is boilies which surprised us, several times during testing, with its incredibly fast action, frequency of strikes and amazing moments, when all our rods ran off the bank in a few seconds. The composition of this bait is perfect for all types of water. It is attractive to carps even during colder months as well as during very warm months. A very successful and powerful shot from Mastodont Baits nicknamed "AK47".

Unusual hairy texture, salty, fruity, spicy taste, balanced mix of fish powder and animal extracts with plenty of carbohydrates, complemented by a combination of fruit and fish flavours and two essential oils. All these premium ingredients and properties have made this boilies a complete bomb for all conditions and all types of water.

Recommendation: Beware of highly attractive boilies and we recommend to bait with smaller volume at wider area, or just a few baits around the rig or using PVA materials. Magic of success is regular baiting, with increase of strikes over the time, until potential of spot for that flavour is exhausted.

Best practice : Very good results during summer time !

Boilies AK-cko is available in 20, 24 and 36mm diameters in solid version as well as in „balanced“ version. Delivered in following packaging : 1kg – bucket, 3kg – bucket and 5kg – bag. Series AK-cko consists of Paste, Booster, Dip, Pop-up 16mm and mixture of 20mm / 24mm balanced boilies in dip.

BOILIES

SQUID ATTACK

Squid Attack is boilies that is especially suitable for longer trips and extreme conditions such as large rivers, big water areas, dams and reservoirs where it is necessary to fish for long distances. Thanks to its maximum naturalness and long break-up time, it is not attractive for small fish and can wait for trophy one. This bait is magnet for big carps. One of the bestsellers of natural boilies in Czech Republic and Slovakia.

Boilies is based on highest quality enzymatic treated animal meal and extracts with a minimum of vegetable ingredients in the legendary squid flavour. Choice no. 1 for longer trips.

Recommendation: boilies suitable for large and long-term baiting campaigns. Once fish starts feeding, it will never stops.

Best practice : Selective boilies – best for large area waters.

Boilies Squid Attack is available in 20, 24 and 36mm diameters in solid version as well as in „balanced“ version. Delivered in following packaging : 1kg – bucket, 3kg – bucket and 5kg – bag. Series Squid Attack consists of Paste, Booster, Dip, Pop-up 16mm and mixture of 20mm / 24mm balanced boilies in dip.

BOILIES

WORMS

Worms is completely unique in its composition and hairy texture of the boilie. This bait is suitable for all types of water, from early spring till late autumn. It is suitable for quick fishing trips as well as for long baiting campaigns, as it will attract all carps in the spot. Worms contains high amount of animal proteins, seafood extracts, mixture of hot spice and premium essences, where bloodworms dominates in particular. The unique hairy texture of the mixture is literally a deception for carps, which consider your bait to be a cluster of bloodworms, what is the main natural food for fish.

Recommendation: boilies suitable for large and long-term baiting campaigns. Once fish starts feeding, it will never stops.

Best practice : Boilies can be pre-soaked, hairy structure appears sooner !

Boilies Worms is available in 20, 24 and 36mm diameters in solid version as well as in „balanced“ version. Delivered in following packaging : 1kg – bucket, 3kg – bucket and 5kg – bag. Series Worms consists of Paste, Booster, Dip, Pop-up 16mm and mixture of 20mm / 24mm balanced boilies in dip.

BOILIES KRILL STRAWBERRY BERGAMOT

**NEW
2023**

Our newest boilies for 2023 : Krill-Strawberry-Bergamot is very attractive boilies for all types of water over whole year. This boilies is more tight meat boilies with slow solubility and fine structure, so it can wait longer for the right strike. In parallel, bait is attractive due to maximum amount of chilli in basic mixture and flavour of citrus fruit – Bergamot. Everything is underlined by aroma of krill and strawberry.

Our new mixture consist of easily digestible fish powder, carbohydrates, monosaccharides and extreme chilli. This combination ensures balanced mix of proteins and energy, which comes to fish slowly. All these parameters are complemented by extracts, amino acids and mixture of essence and essential oil, where krill, strawberry and bergamot is dominating.

This boilie is salty, very hot and has fruit flavour, what makes it suitable for succesfull trophy carp fishing.

Boilies Krill-Strawberry-Bergamot is available in 20, 24 and 36mm diameters in solid version as well as in „balanced“ version. Delivered in following packaging : 1kg – bucket, 3kg – bucket and 5kg – bag. Series Krill-Strawberry-Bergamot consists of Paste, Booster, Dip, Pop-up 16mm and mixture of 20mm / 24mm balanced boilies in dip.

BOILIES

QUICK ACTION

Economic series Quick action / Energy action is built especially for large baiting campaigns or as addition to our HNV boilies. Boilies is easily digestible with break-up time around 8-10 hours at water temperature of 20°C and standard activity of white fish. Boilies consist of right ratio of animal and vegetable proteins to guarantee that fish is not saturated, but is still interested in spot. Series consist of 4 flavours : Fish and Crab, Fish and Fruit, Tutti Frutti and Squid.

Economic series are available in mix of 20mm and 24mm diameters packed in 1kg, 2.5kg nad 5kg.

Fish and Crab – salty flavour + mix of fish and crab essences
Fish and Fruit – salty flavour + fruit essence
Tutti Frutti – sweet flavour + sweet essence
Squid – salty flavour + squid essence

Best practice : Combined with particular booster creates economical base to our HNV boilies in large baiting campaigns.
